

Richael Rice
First Personal Reflection

For this composition I used graphite and bristol board. If I could do something different, I would do a different pose of myself and try to make the proportions better along with working more on different angles when creating a self portrait..

Richael Rice
Animal Eyes

Created these 2 compositions with acrylic paint and wooden canvas. The challenging parts of these two compositions was making the hairs and adjusting the colors to create depth within the hair for each animal.
